

# GOOD2GO

## ELECTRIC VEHICLE CARSHARING

### Happy Black History Month!

To celebrate, we have some **GREAT DEALS!**

If you are a Reduced Rate member, for EVERY HOUR you drive, you get 1/2 an hour free credit to your next ride!

If you are a member but have NEVER used a Good2Go car, if you take TWO rides this month, you will get two free hours for your third trip!

Lastly, if you refer someone and they take their first ride this month, you will get \$25 credit!

If you are unsure if you qualify for reduced rate pricing, please check our [website](#) or contact us for more information.

### General Updates

#### New Policy!

If your booking negatively impacts another persons' booking, you will be charged a \$20 fee (\$10 for Reduced Rate members).

A few examples are

1. Returning the vehicle past the time another person's booking has started.
2. Not plugging in the vehicle after your booking resulting in the next member not being able to take their ride for lack of mileage.

#### New Damage

Before every trip, please take a quick look around the inside and outside of the vehicle. If you see any trash or new damage, please take a picture and email us! We don't want you to be blamed for someone else's mess!

#### Vehicle Winterization

With the changing weather, sometimes the charge on our cars drops dramatically if they are not plugged in. At the end of each booking, make sure the car is charging. Also, in the trunk of each car there should be a little shovel and ice scraper. Please let us know if either are missing.

## Check them out: EVHYBRIDNOIRE

EVHYBRIDNOIRE nation's largest network of diverse electric vehicle (EV) drivers and enthusiasts.

We work to advance EVs and multimodal e-mobility solutions across the U.S., and ensure those solutions are inclusive and equitable. We do that by engaging with communities often left out of e-mobility discussions, advocating for e-mobility solutions in underserved communities, and shifting the narrative about e-mobility to be more inclusive of diverse populations with electric, connected, autonomous and shared mobility.

We envision a world where all communities are free of air pollution from cars and trucks, and *everyone* can reap the benefits of electric vehicles and other e-mobility solutions.

### EXECUTIVE DIRECTOR SPOTLIGHT

#### Susan Buchan

Would you like to be our next member spotlight?

All it takes is a quick email to us at [info@evgood2go.org](mailto:info@evgood2go.org) and we will find 10-15 minutes to chat!

Susan began her career as a trained architect in the clean energy field. During the 2008 housing crisis, she decided it was time for a career transition. Because of her experience working in the clean-energy field and her ever-growing concern about climate change, Susan began working for the Conservation Services Group in 2011, leading many programs which worked towards creating a greener and more sustainable future.

In 2016 Susan joined with E4TheFuture and founded the Good2Go project in 2019 with the mission to make electric vehicles accessible to all. She explains, "There is a need in all communities for transportation. As we transition in the electrification of transportation, we need to make sure everyone has access to this technology at an affordable price."

Susan's hope is that Good2Go will expand and serve every affordable housing complex throughout Massachusetts and beyond.

To support Good2Go's growth, reach out to your local representatives and encourage electric vehicle car sharing in your neighborhood.

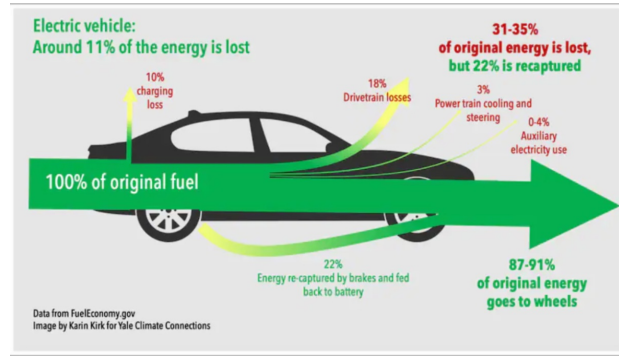

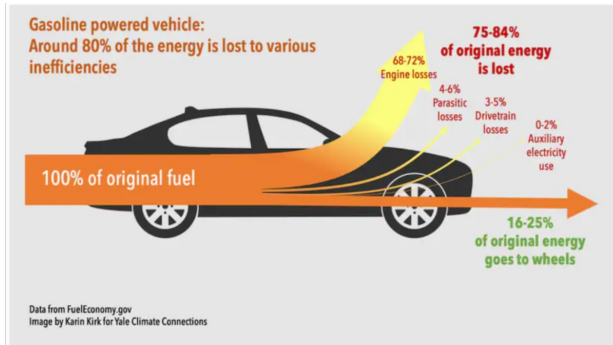

## Electric Vehicles vs Internal Combustion Engines

Say you drop \$5 on a gallon of gas—only about \$1 dollar's worth actually gets you moving in a traditional vehicle.

Out of the 8.9 million barrels of gasoline consumed daily in the U.S. on average, only 1.8 million gallons, or approximately 20 percent, actually propel an internal combustion vehicle forward. The other 80

percent is wasted on heat and parasitic auxiliary components that draw away energy.
