

GOOD2GO

ELECTRIC VEHICLE CARSHARING

General Updates

New Policy!

If your booking negatively impacts another persons' booking, you will be **charged a \$20 fee** (\$10 for Reduced Rate members).

A few examples are

1. Returning the vehicle past the time another person's booking has started.
2. Not plugging in the vehicle after your booking resulting in the next member not being able to take their ride for lack of mileage.

Don't forget to charge the vehicle at the end of your trip!

Damage?

Before every trip, please take a quick look around the inside and outside of the vehicle. If you see any trash or new damage, please take a picture and email us! We don't want you to be blamed for someone else's mess!

How long does charging really take?

The time it takes to charge an electric vehicle ranges from 20 minutes to 40 hours. This is because of the many variables affecting charging at any given time. However, below are the rough estimates for each type of charger.

Level 1: Typically 40+ Hours

In the trunk of every Good2Go car there is a Level 1 charger. It is a long cord with a charger on one end and a normal outlet plug on the other. This method delivers a maximum of 5 miles of range per hour of charging.

Level 2: Typically 4-15 Hours

These are the most commonly found chargers around Massachusetts, and what Good2Go mainly uses. They are best for charging overnight.

Level 3/DC Fast Charging: 20 min - 1 Hour

While Level 1 and 2 both send energy through AC charging, the DC fast chargers,

convert AC power to DC within the charging station and deliver DC power directly to the battery. This means charging can occur exponentially faster.

You

MEMBER SPOTLIGHT

Would you like to be our next member spotlight?

All it takes is a quick email to us at info@evgood2go.org and we will find 10-15 minutes to chat!

Send us your Feedback!

If you haven't already, please send along your feedback on the Good2Go program! We are always trying to improve our services.
